aquacultural engineering

Contents of volume 20

April 1999 (Volume 20, Number 1)

Water flow requirements in the intensive production of Atlantic salmon (*Salmo salar* L.) fry: growth and oxygen consumption
S. Fivelstad (Bergen, Norway), A. Bergheim (Stavanger, Norway), H. Kløften (Bergen, Norway), R. Haugen, T. Lohne (Sævareid, Norway) and A. Berit Olsen (Minde, Norway) 1

An emergency aeration system for use in aquaculture
S. Appelbaum, A. Prilutsky and V. Birkan (Sede-Boker Campus, Israel) . . . 17

Swimming speed and morphological features of mixed populations of early maturing and non-maturing fish
E. Boucher (Sidney, Canada) and R. J. Petrell (Vancouver, Canada) 21

A live food feeder
S. Appelbaum and V. Birkan (Sede-Boker Campus, Israel) 37

Modeling the major limitations on nitrification in floating-bead filters
W. J. Golz, K. A. Rusch and R. F. Malone (Baton Rouge, LA, USA) 43

Announcement 63

Aquacultural Engineering Society 65

Guide for authors 67

June 1999 (Volume 20, Number 2)

Water quality trials in four recirculating aquacultural system configurations
S. Singh, J. Ebeling and F. Wheaton (USA) 75

A model system for keeping spawners of wild and domestic fish before artificial spawning
R. Kujawa, D. Kucharczyk and A. Mamcarz (Olsztyn-Kortowo, Poland). . . . 85

Reuse of highly saline aquaculture effluent to irrigate a potential forage halophyte, *Suaeda esteroa*
J.J. Brown and E.P. Glenn (Tucson, USA) 91

Risks associated with the use of chemicals in pond aquaculture
C.E. Boyd and L. Massaut (Auburn, USA). 113

Aquacultural Engineering Society 133

August 1999 (Volume 20, Number 3)

Biomass production and nutrient uptake by *Isochrysis* aff. *galbana* (Clone T-ISO) cultured with a low cost alternative to the f/2 medium
E. Valenzuela-Espinoza, R. Millán-Núñez and F. Núñez-Cebrero (Ensenada, Mexico) 135
Northern quahog, *Mercenaria mercenaria*, seed clam waste characterization study: precursor to a recirculating culture system design
T.J. Pfeiffer (Savannah, USA), T.B. Lawson and K.A. Rusch (Baton Rouge, USA) 149
Reduction of effluent discharge and groundwater use in catfish ponds
T.P. Cathcart, J.W. Pote and D.W. Rutherford (MS, USA) 163
Optimization of forage in two food-filtering organisms with the use of a continuous, low-food concentration, agricultural drip system
J.L. Ramírez, S. Avila and A.M. Ibarra (La Paz, Mexico) 175
Membrane technology for the continuous separation microalgae/culture medium: compared performances of cross-flow microfiltration and ultrafiltration
N. Rossignol, L. Vandanjon, P. Jaouen and F. Quéméneur (Saint-Nazaire, France) 191

September 1999 (Volume 20, Number 4)

Review of opportunities for low stress and selective control of fish
J.A. Lines and A.R. Frost (Bedford, UK) 211
Waste excretion characteristics of Manila clams (*Tapes philippinarum*) under different temperature conditions
S. Zhu, B. Saucier, J. Durfey, S. Chen (Pullman, USA) and B. Dewey (Shelton, USA) 231
An experimental study on nitrification biofilm performances using a series reactor system
S. Zhu and S. Chen (Pullman, WA, USA) 245
Using modified length–weight relationships to assess the condition of fish
R.E. Jones (New Westminster, Canada), R.J. Petrell and D. Pauly (Vancouver, Canada) 261
